

# acre Intrusion Connect: For System Users

## Get Connected, Take Control

Empower your business with acre Intrusion Connect cloud-based solution

**acre Intrusion Connect** puts you in control of your intruder detection system, wherever you are. As the system user, you can connect to your acre Intrusion system via an attractive, ergonomic, and easy-to-use mobile application or web browser from anywhere, at any time.

## Why Us

Secure Remote Access

Graphical Map Interface

Encrypted, Safe, & Reliable

Fully GDPR compliant

acre Intrusion Connect is acre security's SaaS service platform for companies that are looking for a secure and "always on" cloud-based platform. It is packed with features so you can manage multiple sites from any remote location.

### Stay Connected

Arm and disarm your systems comfortably via mobile app.

### Keep Up To Date With Your System Events

Receive push notifications within your mobile app or via email. Provides direct email notifications to your maintenance contractor if faults or other events occur on any panel so they can take action remotely.

### Manage Multiple acre Intrusion Panels

Easily add and manage multiple acre Intrusion systems.

### Self-Monitoring

React quickly in case of an alarm so you can take the initiative. View-in, listen-in, and speak-in during an active alarm or to verify an alarm.

### Lock & Unlock Doors Remotely

Use the mobile app to lock, unlock, or momentarily unlock your doors remotely.

### Graphical Map

Use the interactive map to visualize alarms and events from your acre Intrusion system. A graphical map provides you with the option of adding multiple layers and visualizing the installation to quickly see the status of your premises.

### Encrypted, Safe, & Reliable Connections

Financial grade SSL ensures the highest standards of security are always maintained, providing total peace of mind.

### GDPR Compliant

- ✔ Data storage & hosting
- ✔ Microsoft® Azure Cloud Computing Services
- ✔ Server location: restricted to EU
- ✔ Fully compliant with EU GDPR regulations
